

PACIFIC SPACEFLIGHT

with Earth and Space Exploration, LLC

is proud to offer an introductory

Spaceflight Training Program

August 15-19, 2019 in Seattle, Washington

In this 4-day course you will actively take steps towards the stars! Students will log several hours pressurized with air and breathing oxygen in Pacific Spaceflight IVA spacesuits, learning how to work comfortably at suit pressures. Students will also train for a variety of off-nominal landing scenarios, including water landing and capsule egress. Learn compliance with Code of Federal Regulations standards (14 CFR 460.51 spaceflight participant) for such emergency situations and get college credit to do so! This course will cover further introductory topics such as: pressure suit history, flight physiology, and response to emergency spaceflight situations.

Day 1: Introduction, assignment of spacesuits to students, spacesuit history and physiology, first suit up

Day 2: Smoke and Fire response, Spacecraft sea egress

Day 3: Skygenie and Mode VIII egress, prep for high altitude flight

Day 4: Flight to 25,000 ft MSL in unpressurized aircraft with pressure suit

Cost: **\$4,000 USD**

College Credit: **\$165 USD**

Includes 4 nights lodging breakfast and WiFi at Tukwila Ramada; airport shuttle; all training and simulations and suited test flight to 25,000'. Cost excludes transportation to and from Seattle, WA, lunch and dinner.
